Location: Detroit, Michigan  
Square Footage: 60, 000 square feet  
Role: Designer (Thesis - Graduate Studies)

New Chiawana High School - Exterior Envelope Study  
(While at Ambia Architecture)

These sketches were developed as an alternative to the more traditional architectural style developed during predesign charettes. The intent was to explore a more “contemporary” expression for the language of the exterior envelope.

## NEW CHIAWANA HIGH SCHOOL

Location: Pasco, Washington

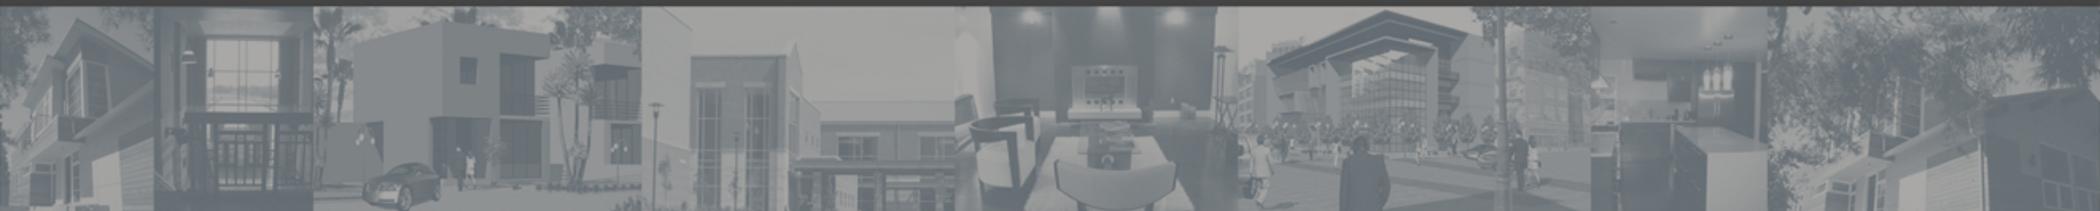

Square Footage: 337, 700 square feet

Role: Designer (Design of exterior envelope, entrance lobby and commons area)

## Massing/Volumetric Study (While at Ambia Architecture)

The intent of this design was to create an inviting and community friendly spatial configuration while maintaining the level of security required of a sheriff's office.

By bringing the multipurpose room to the street side and pushing the spaces that house the day-to-day activity to the back, this approach promoted not only the accessibility of the multipurpose room, but also projected an approachable facade to the community.
